Suppliers will be expected to provide prices for the following three sets of tasks:

1. A minimum support capability (average of 20 hours per month)
2. Development of a meta-data export interface, as well as an integrated data visualization interface and query interface (240 hours estimated).

URS and SRS will be developed with the available hours in mind in conjunction with the SAEON CDIO or equivalent;
 - b. Development of a query interface, with visualization of time series data from observations. These interfaces will be specified (URS and SRS) in collaboration with the SAEON CDIO or equivalent to fit within available development hours.
