Introduction
NRF Working Definition of Research Excellence

- Notions of ‘research excellence’ range from a technical to more expanded interpretations of what quality in research means.

- Reviews and Evaluations business processes should be internationally aligned, with products (review/recommendations outcomes)/services (stakeholder relations) that advance cutting edge knowledge while addressing various dimensions of societal transformation.

- Robust Peer-review processes to assess:
  - Research Grant Applications,
  - Instruments’ Performance
  - Grant holder Performance
  - In the Rating of individual Researchers
Supporting Research Excellence

- Supporting Research Excellence
- Ways of Supporting Research Excellence: Institutional Perspectives
- NRF Perspectives
- R&E Perspectives
Thank You
